

DAY- 3 Assignment

Create a document providing all steps for publishing using self contained and dependent mode

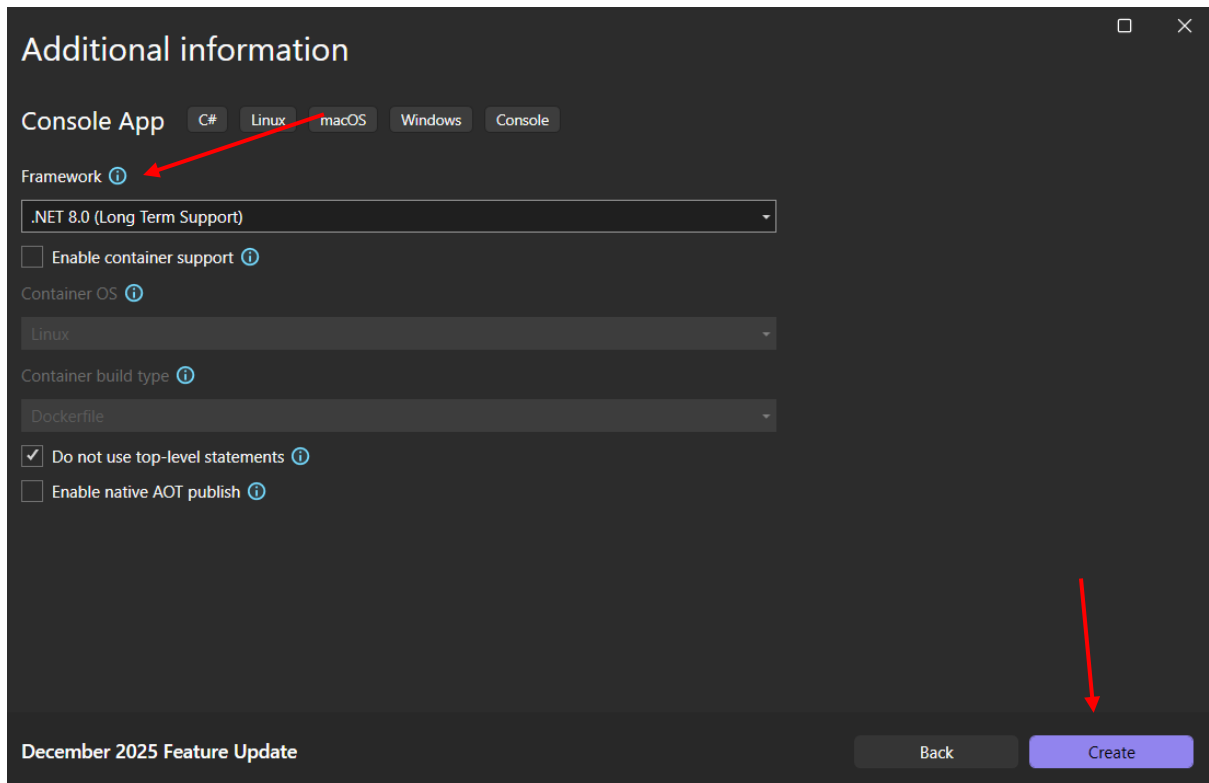

Step-1 : Create a new Project

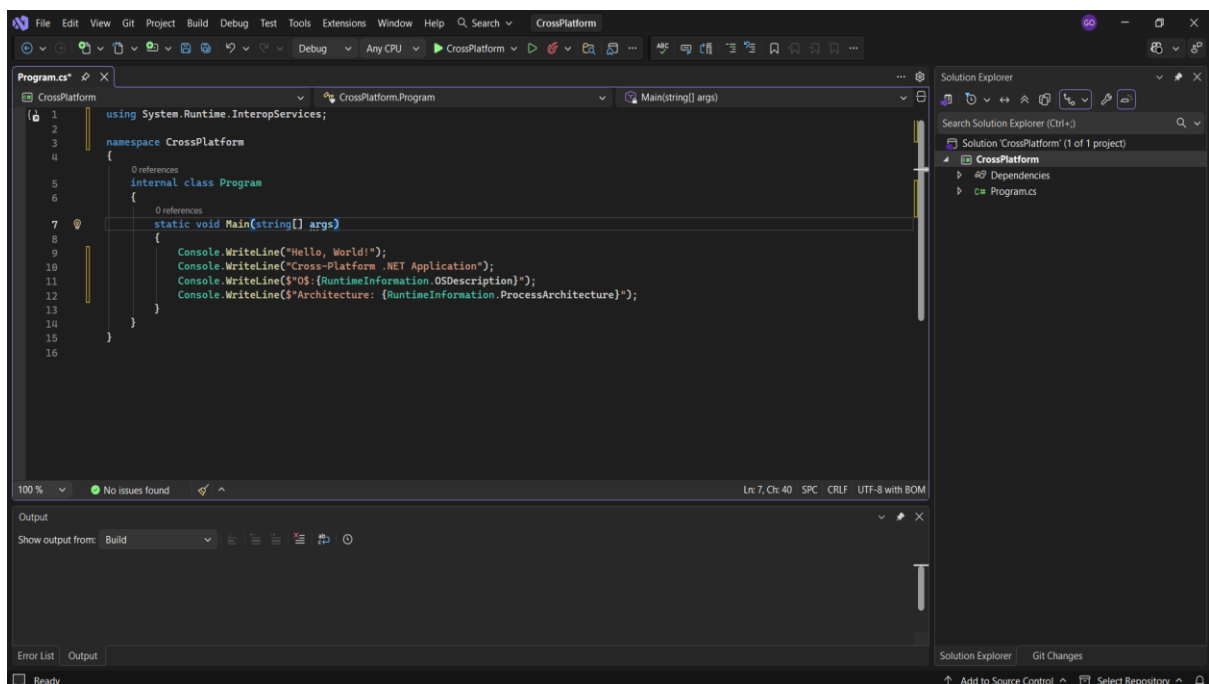

Choose the Console App and click on next

Write a Project name and click on next

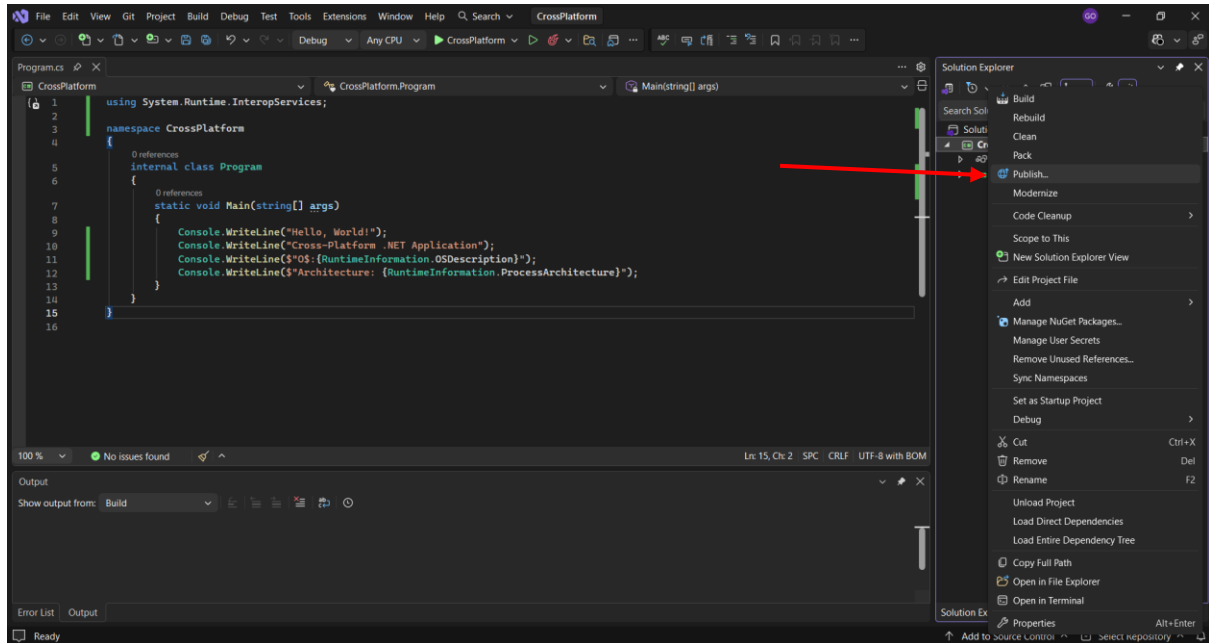

Select .NET 8.0 Framework and click on Create

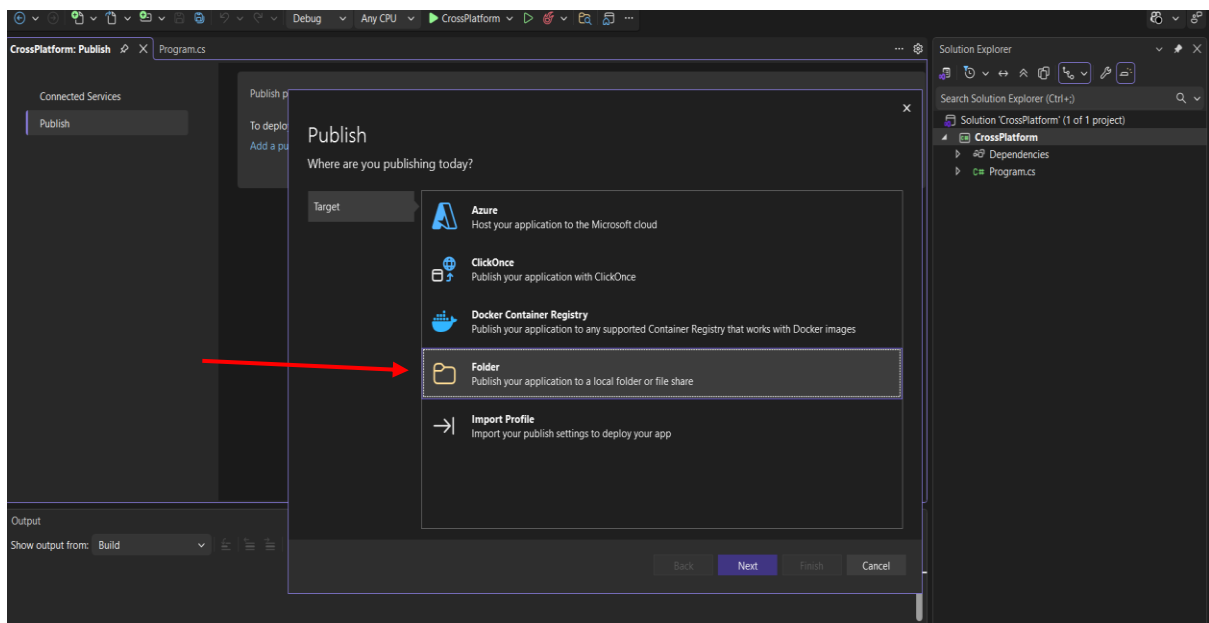

This is how a new project is created

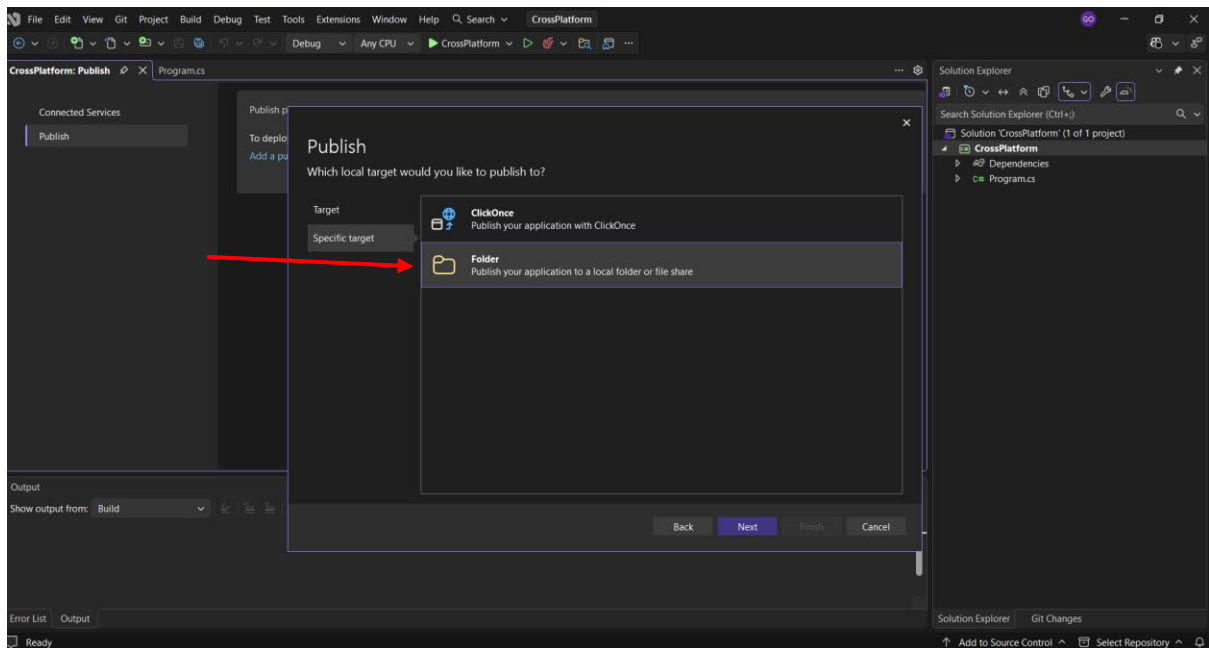

Step 2: Right click on the project name and select Publish Option

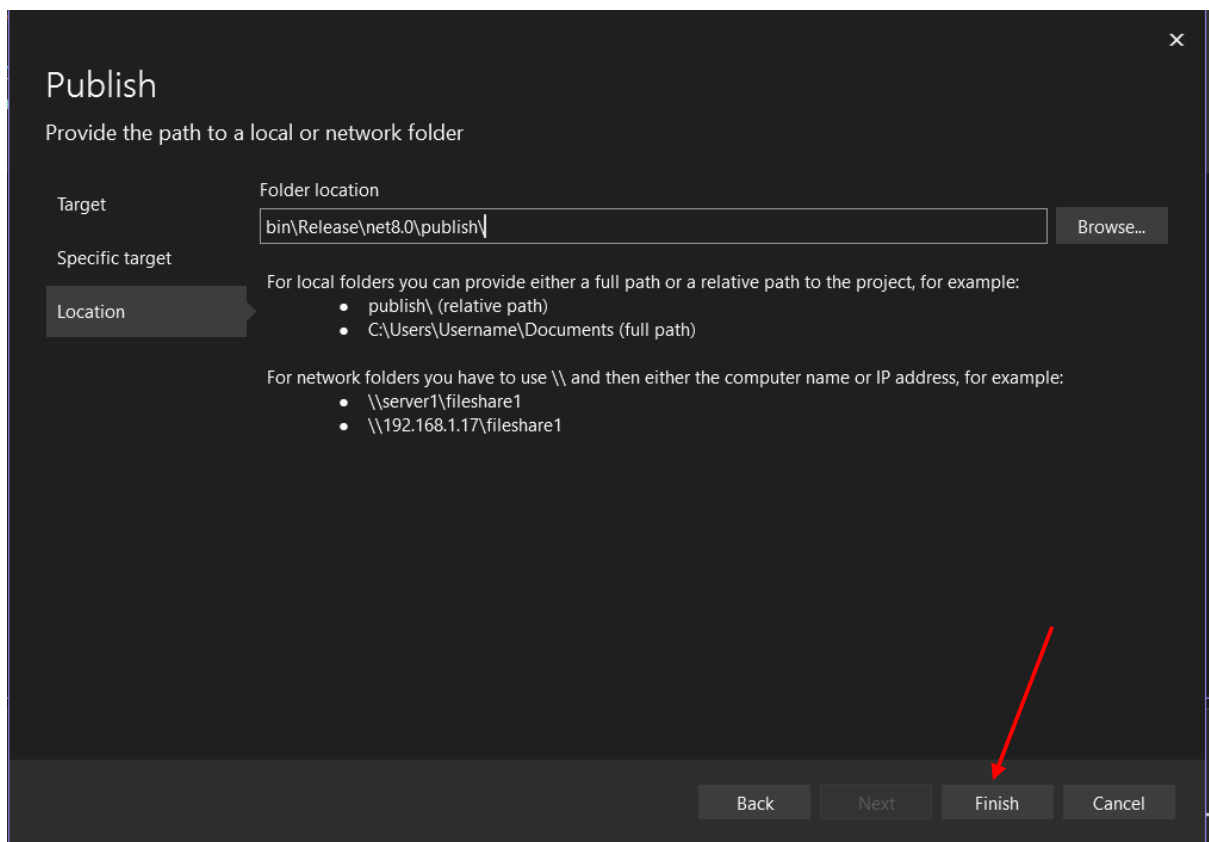

Step 3: After clicking on the Publish then select Folder and click on next

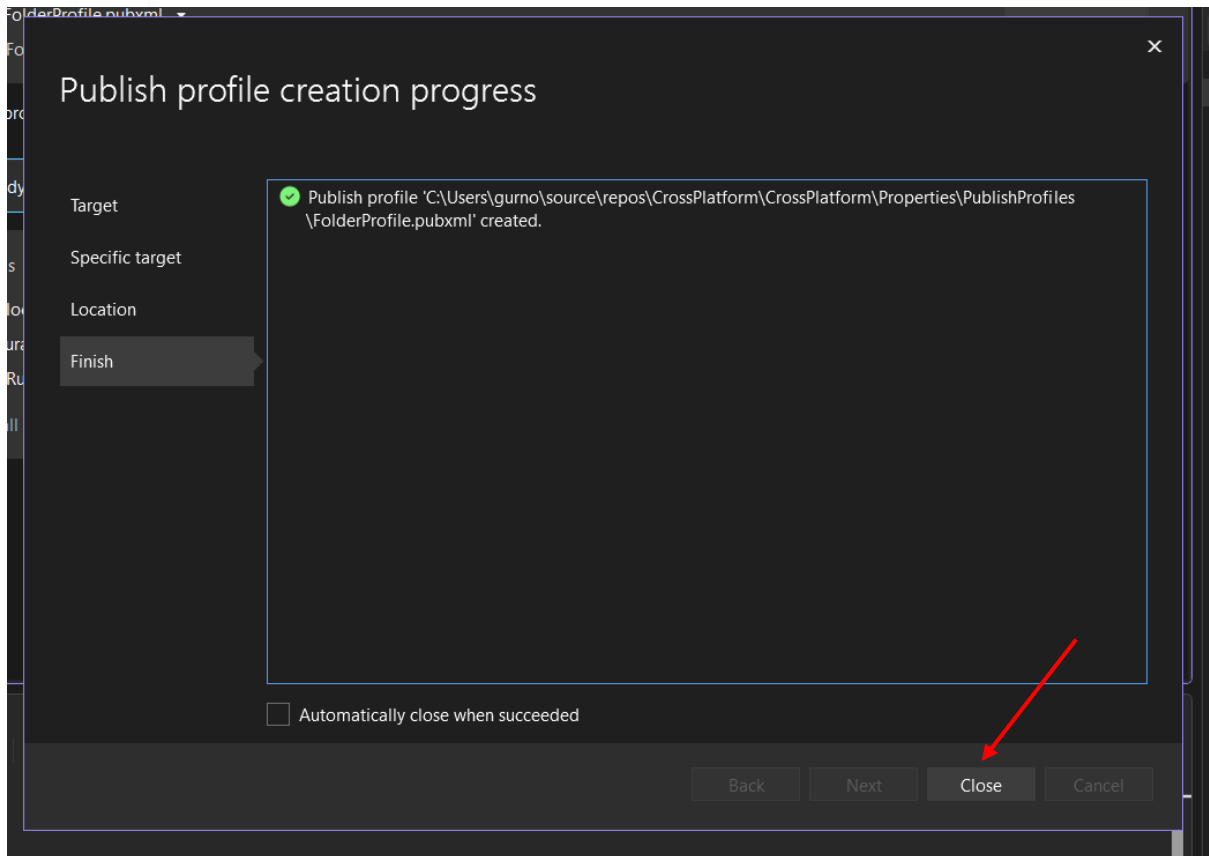

Step 4: After that again select the Folder and click on Next

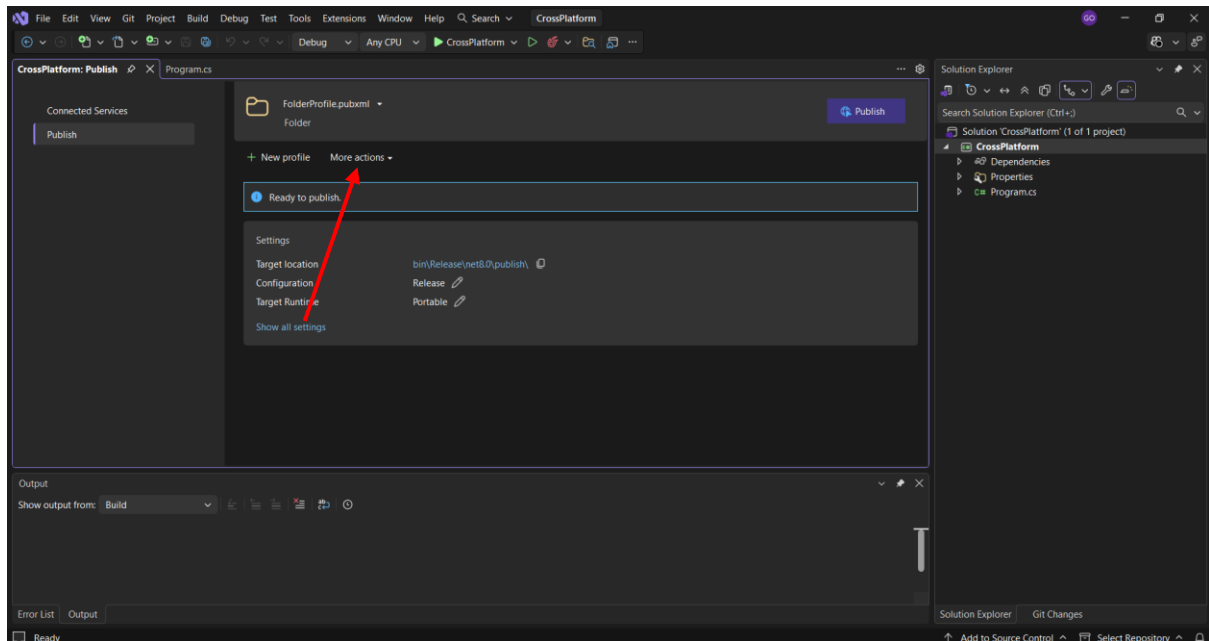

Step 5: Location of the Folder will be shown then click on Finish

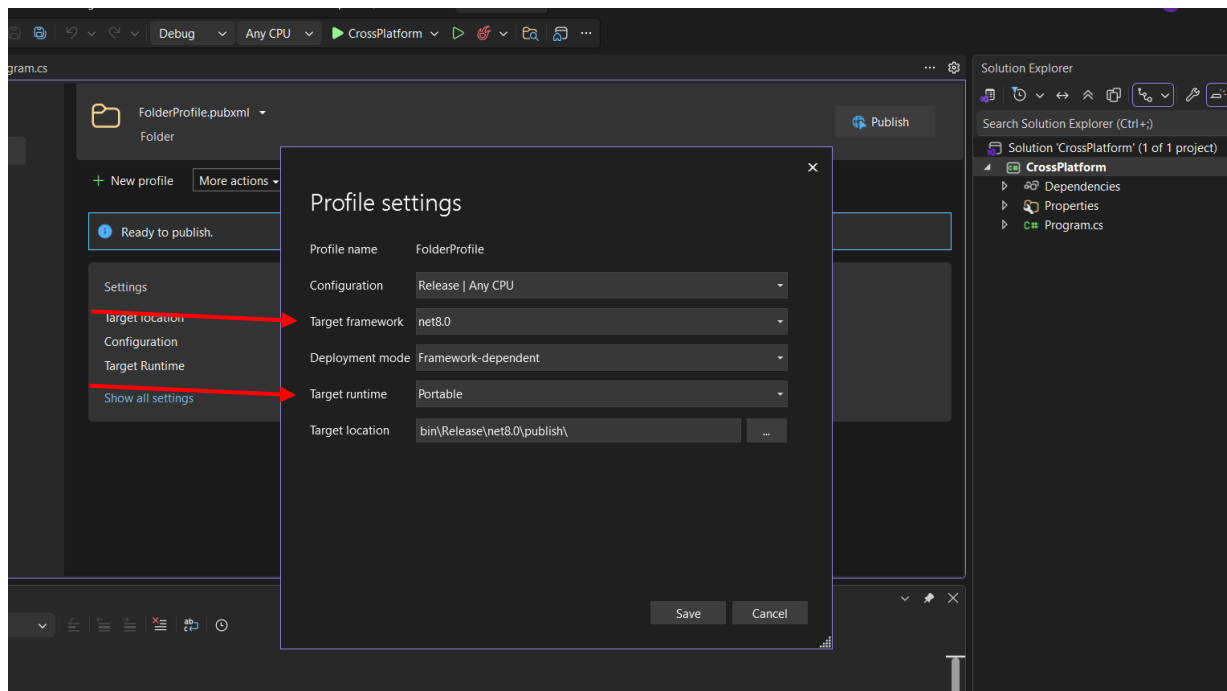

Step 6: In the Publish Profile Creation Progress click on Close

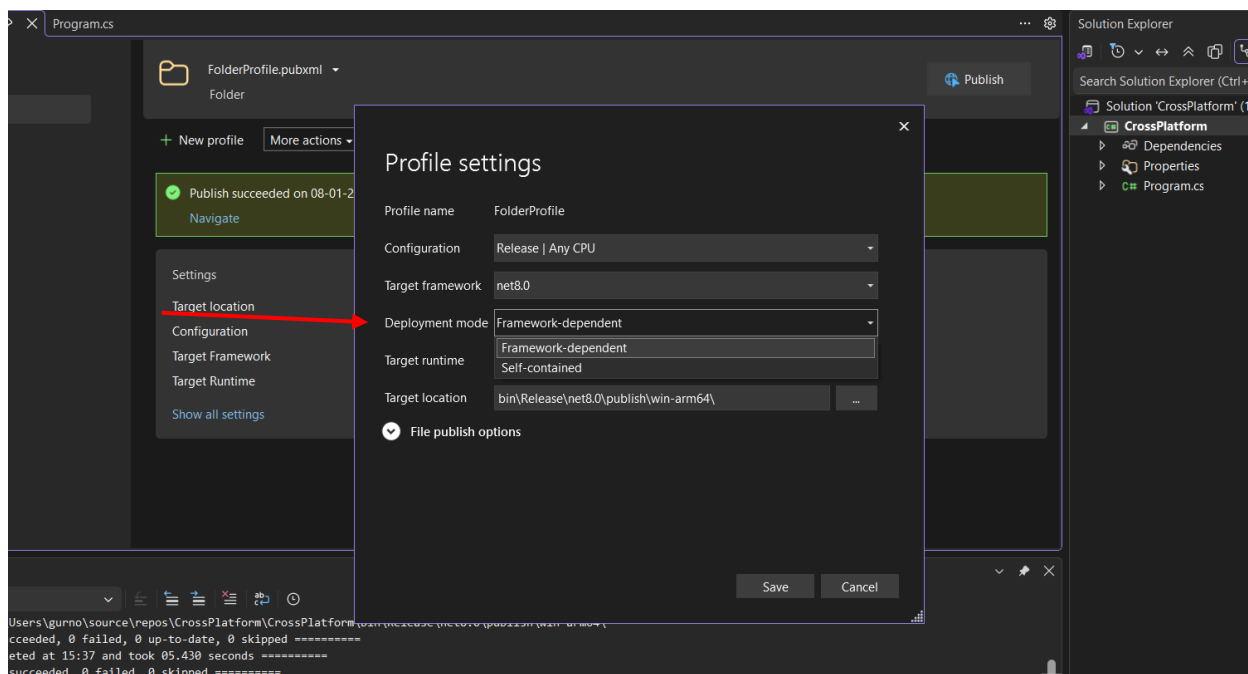

Step 7: After that click on More Actions and select Edit option

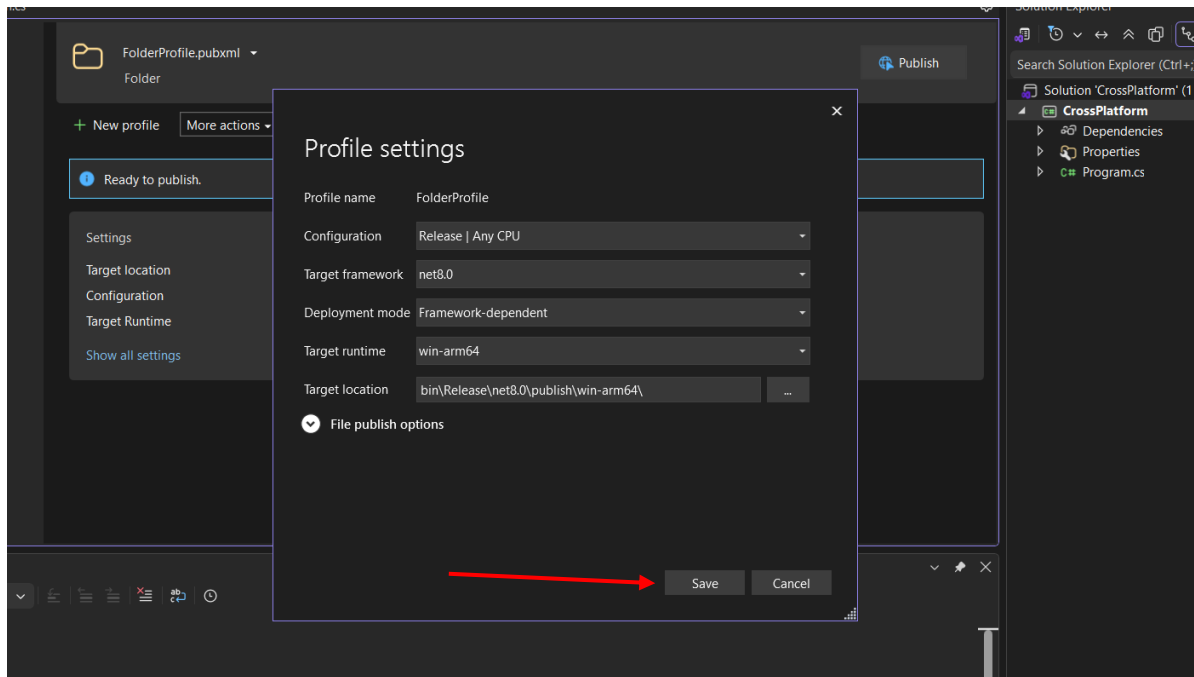

Step 8: In the Profile Setting, we have to change the Target Framework to .NET 8.0 and we select Target runtime

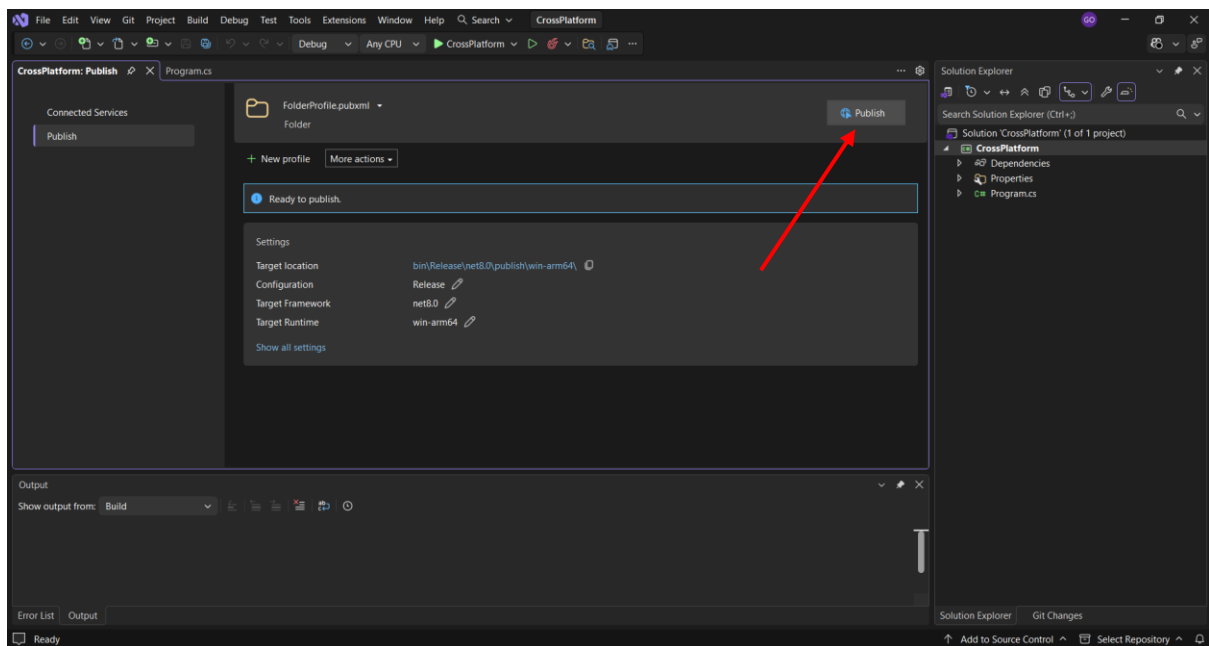

Step 9 : In the Profile section, we can choose Deployment Mode from the drop down i.e. either Framework-Dependent or Self Contained as per our requirement.

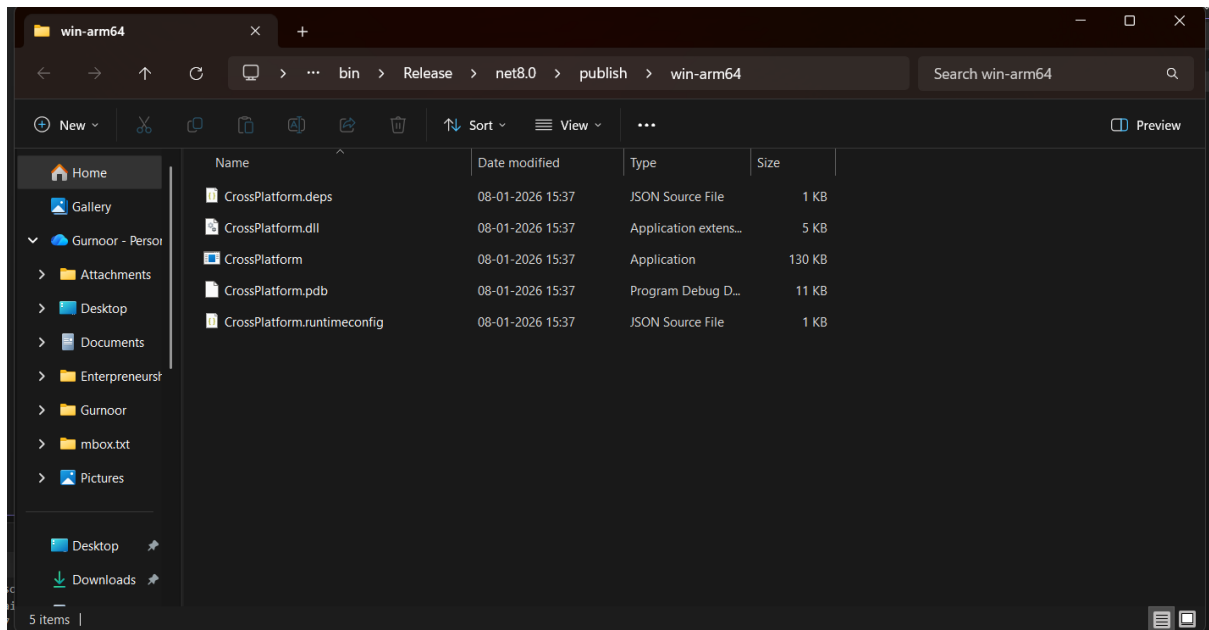

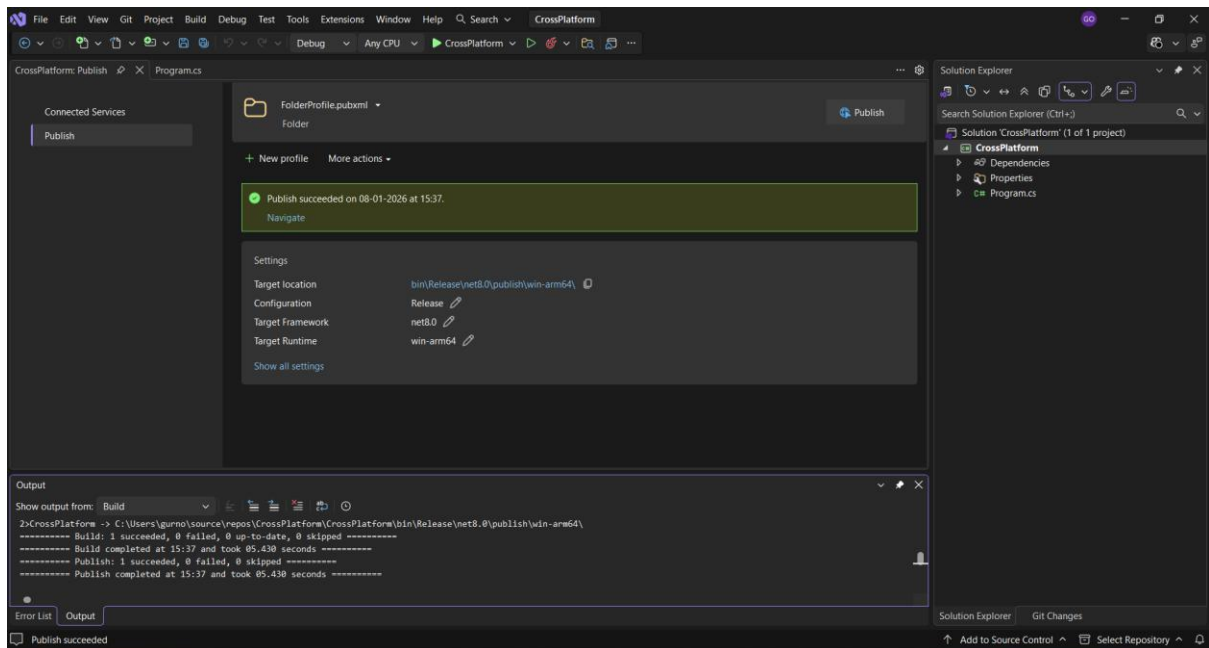

Step 10: After making all the changes in the profile section click on Save button

Step 11: Click on Publish button

Step 12: Now project is published

It the location of the project or target location
